

Healthcare and Social Assistance

PA Dream Team PURPOSE:

The purpose of the PA Dream Team is to introduce students to STEM career opportunities in the Healthcare and Social Assistance industry. The typical student in middle school and early high school has no idea of what a job in these areas look like. The most effective way to expose young students to these careers is for them to meet successful professional employees who are working in the field. Dream Team members are employees who can share their career stories and by doing so unlock these interests in students.

PA Dream Team PROGRAM:

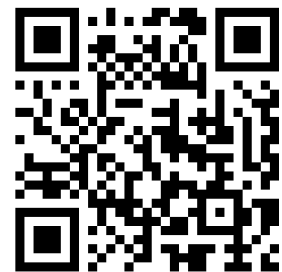

The Dream Team program features professionals sharing their career journey through live presentations, hands on activities, and media exposure. Members engage with classrooms and at community events to showcase their unique jobs and educational pathways.

Are you;

- Located in Cameron, Clearfield, Elk, Jefferson, McKean, or Potter County in PA?
- Thriving in a STEM-related profession?
- Keen to inspire students and others by sharing your career path and daily experiences?
